

# DYNAMIC SCULPTURE OF A THINKING HEAD (SYMBOL, **ICON** OF SILICON VALLEY)

San Jose – Ideas Hub Of Silicon Valley “Perpetual Engine “- Generator of New Ideas.

**Suggestion.**  
If the work of the three finalists is interesting enough, original and embodies the task of creating a symbol of Silicon Valley - it is proposed implementing all three works. The city of San Jose will have three new attractions.

Three ICONS on the same theme. This is unconventional, but original. The history of the contest, the results of the contest, and how they appeared. These are legends that are very intriguing to curious tourists, guests of the city.

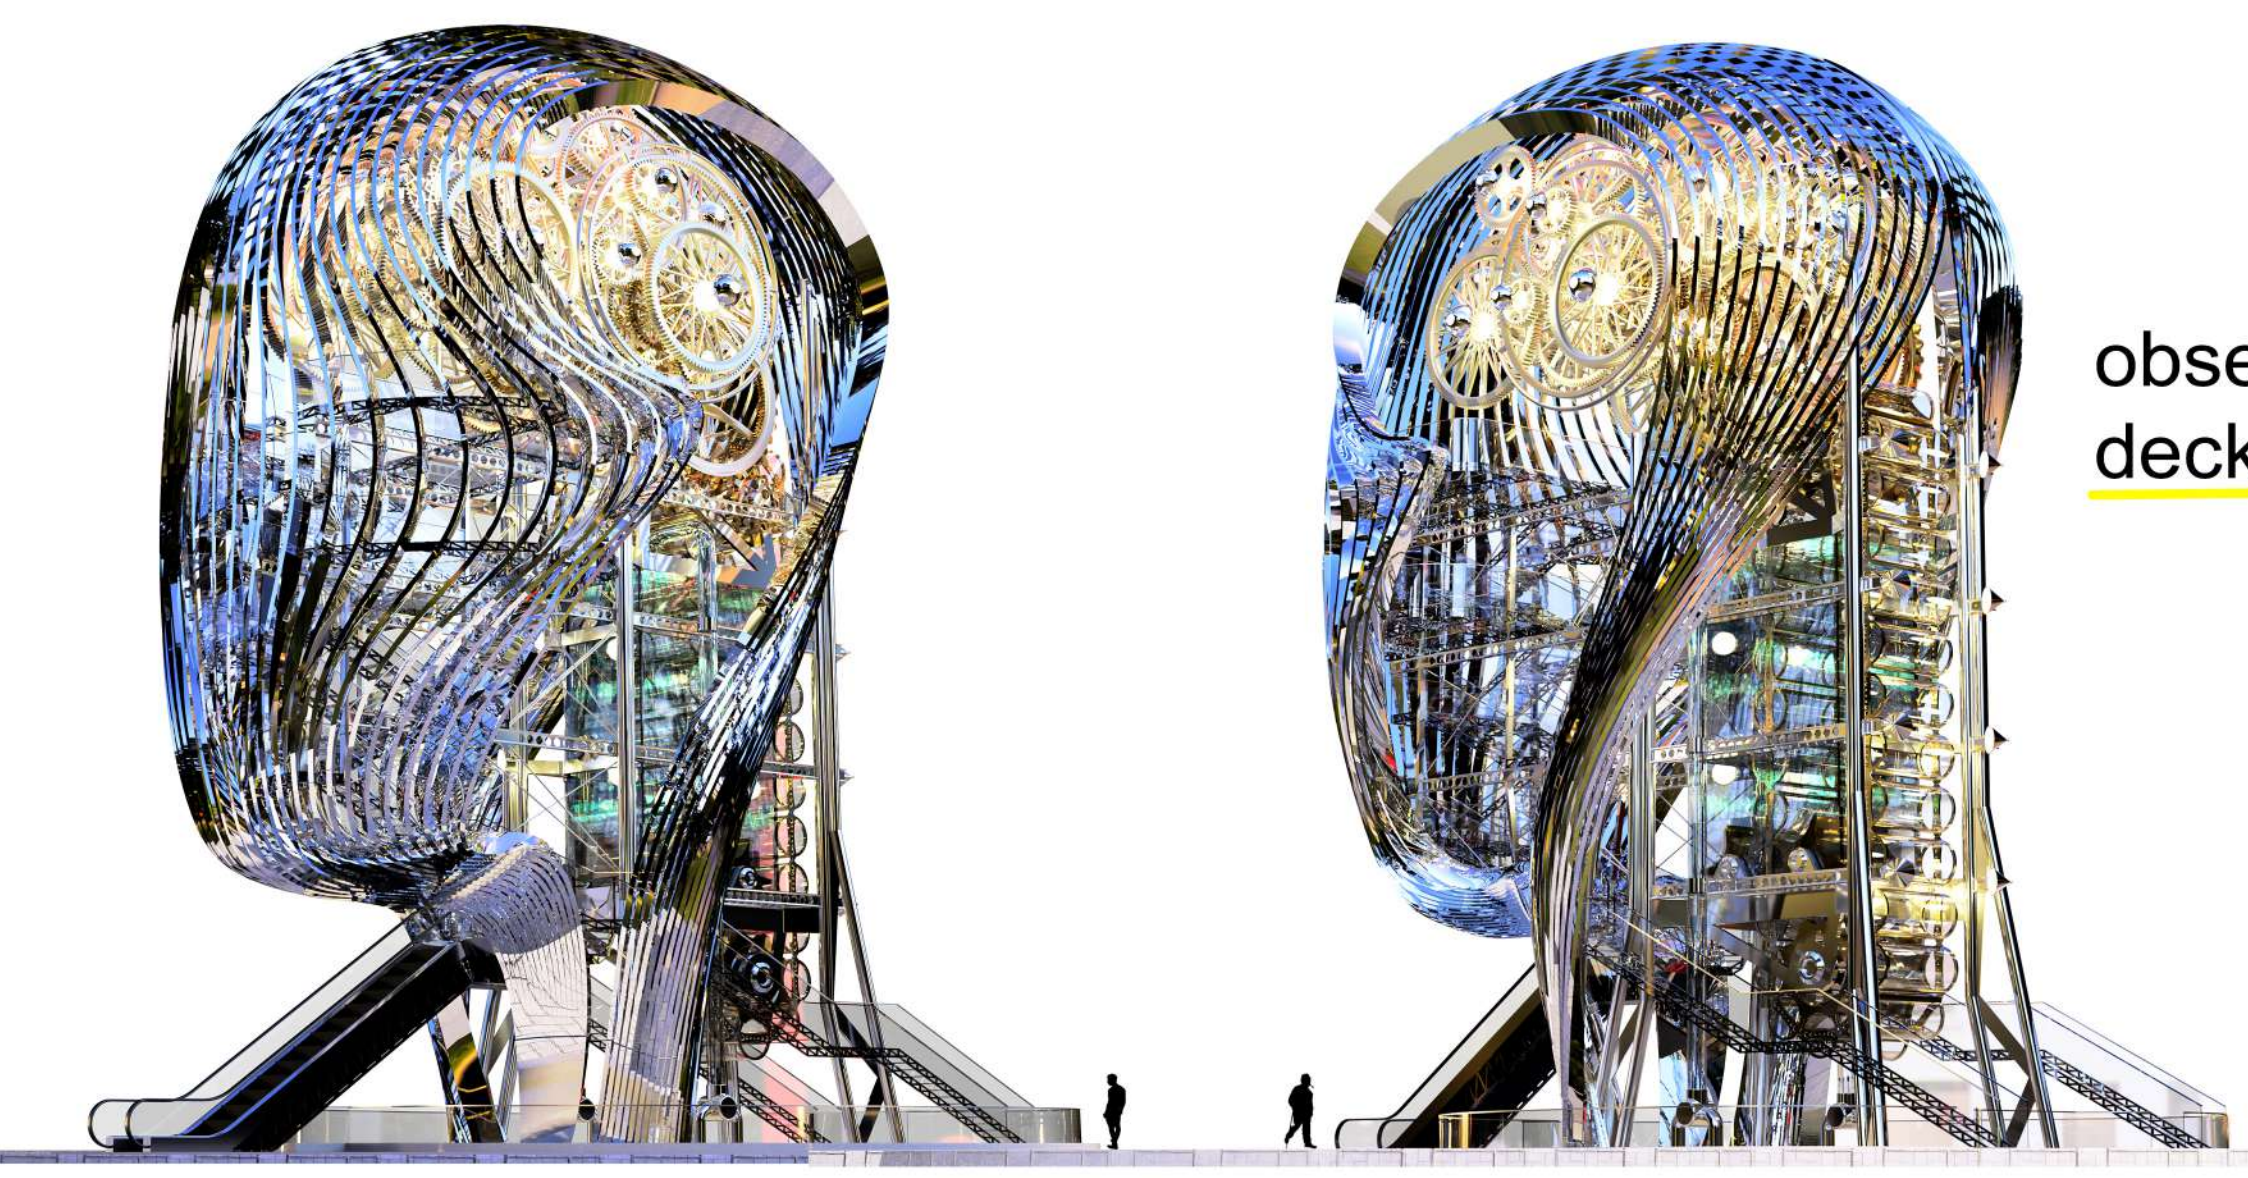

I think the best place to implement the proposed dynamic sculpture is the Plaza de Cesar Chavez; along the axis of Park Avenue.

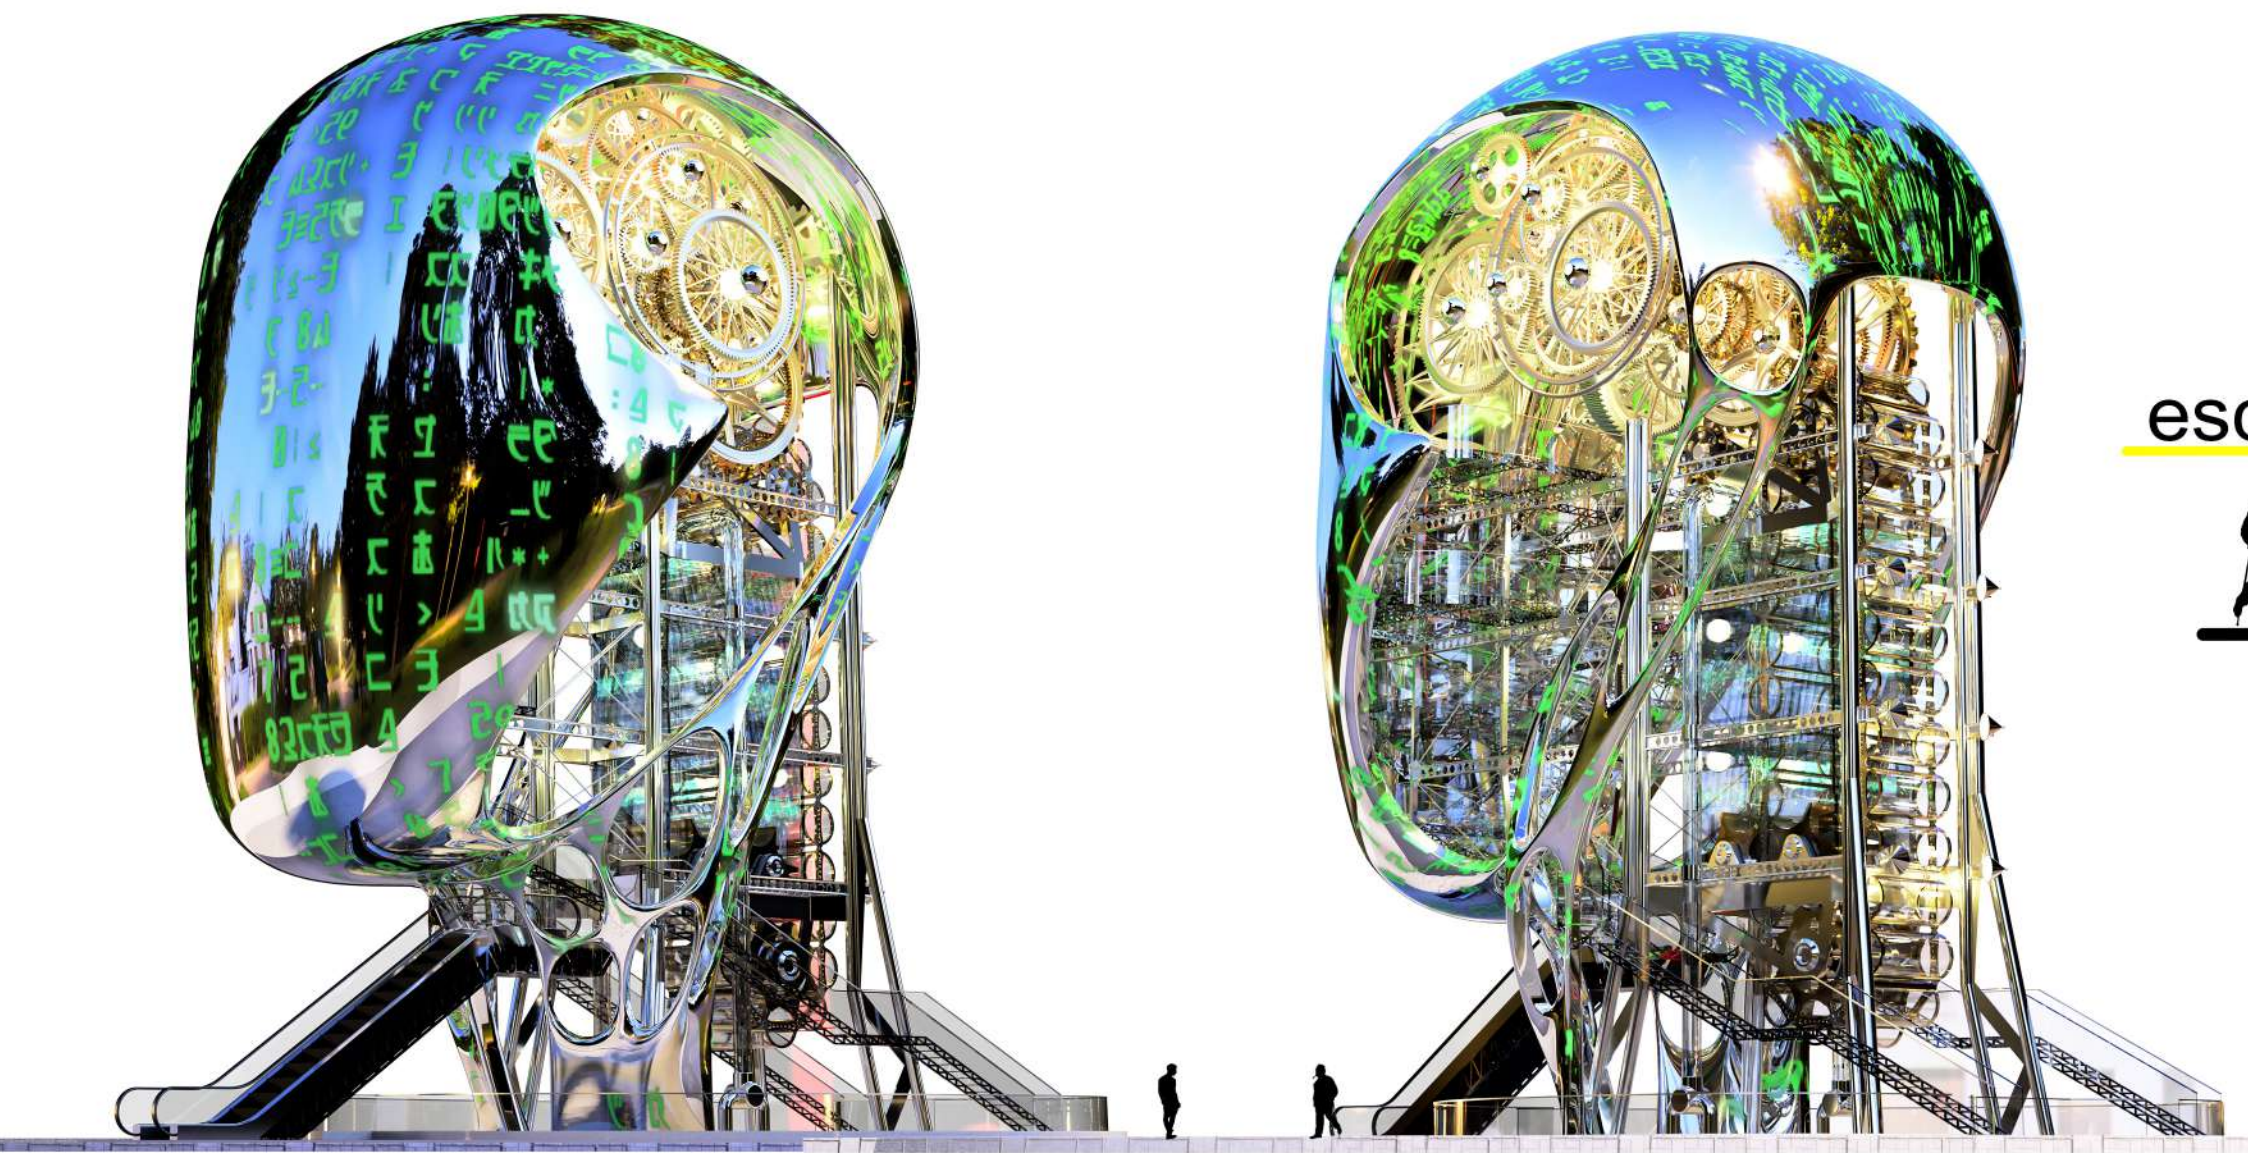

or opposite the San Jose Center for the Performing Arts, on Park Avenue. Greene arena is a place for picnics and recreation and there are many problems here.

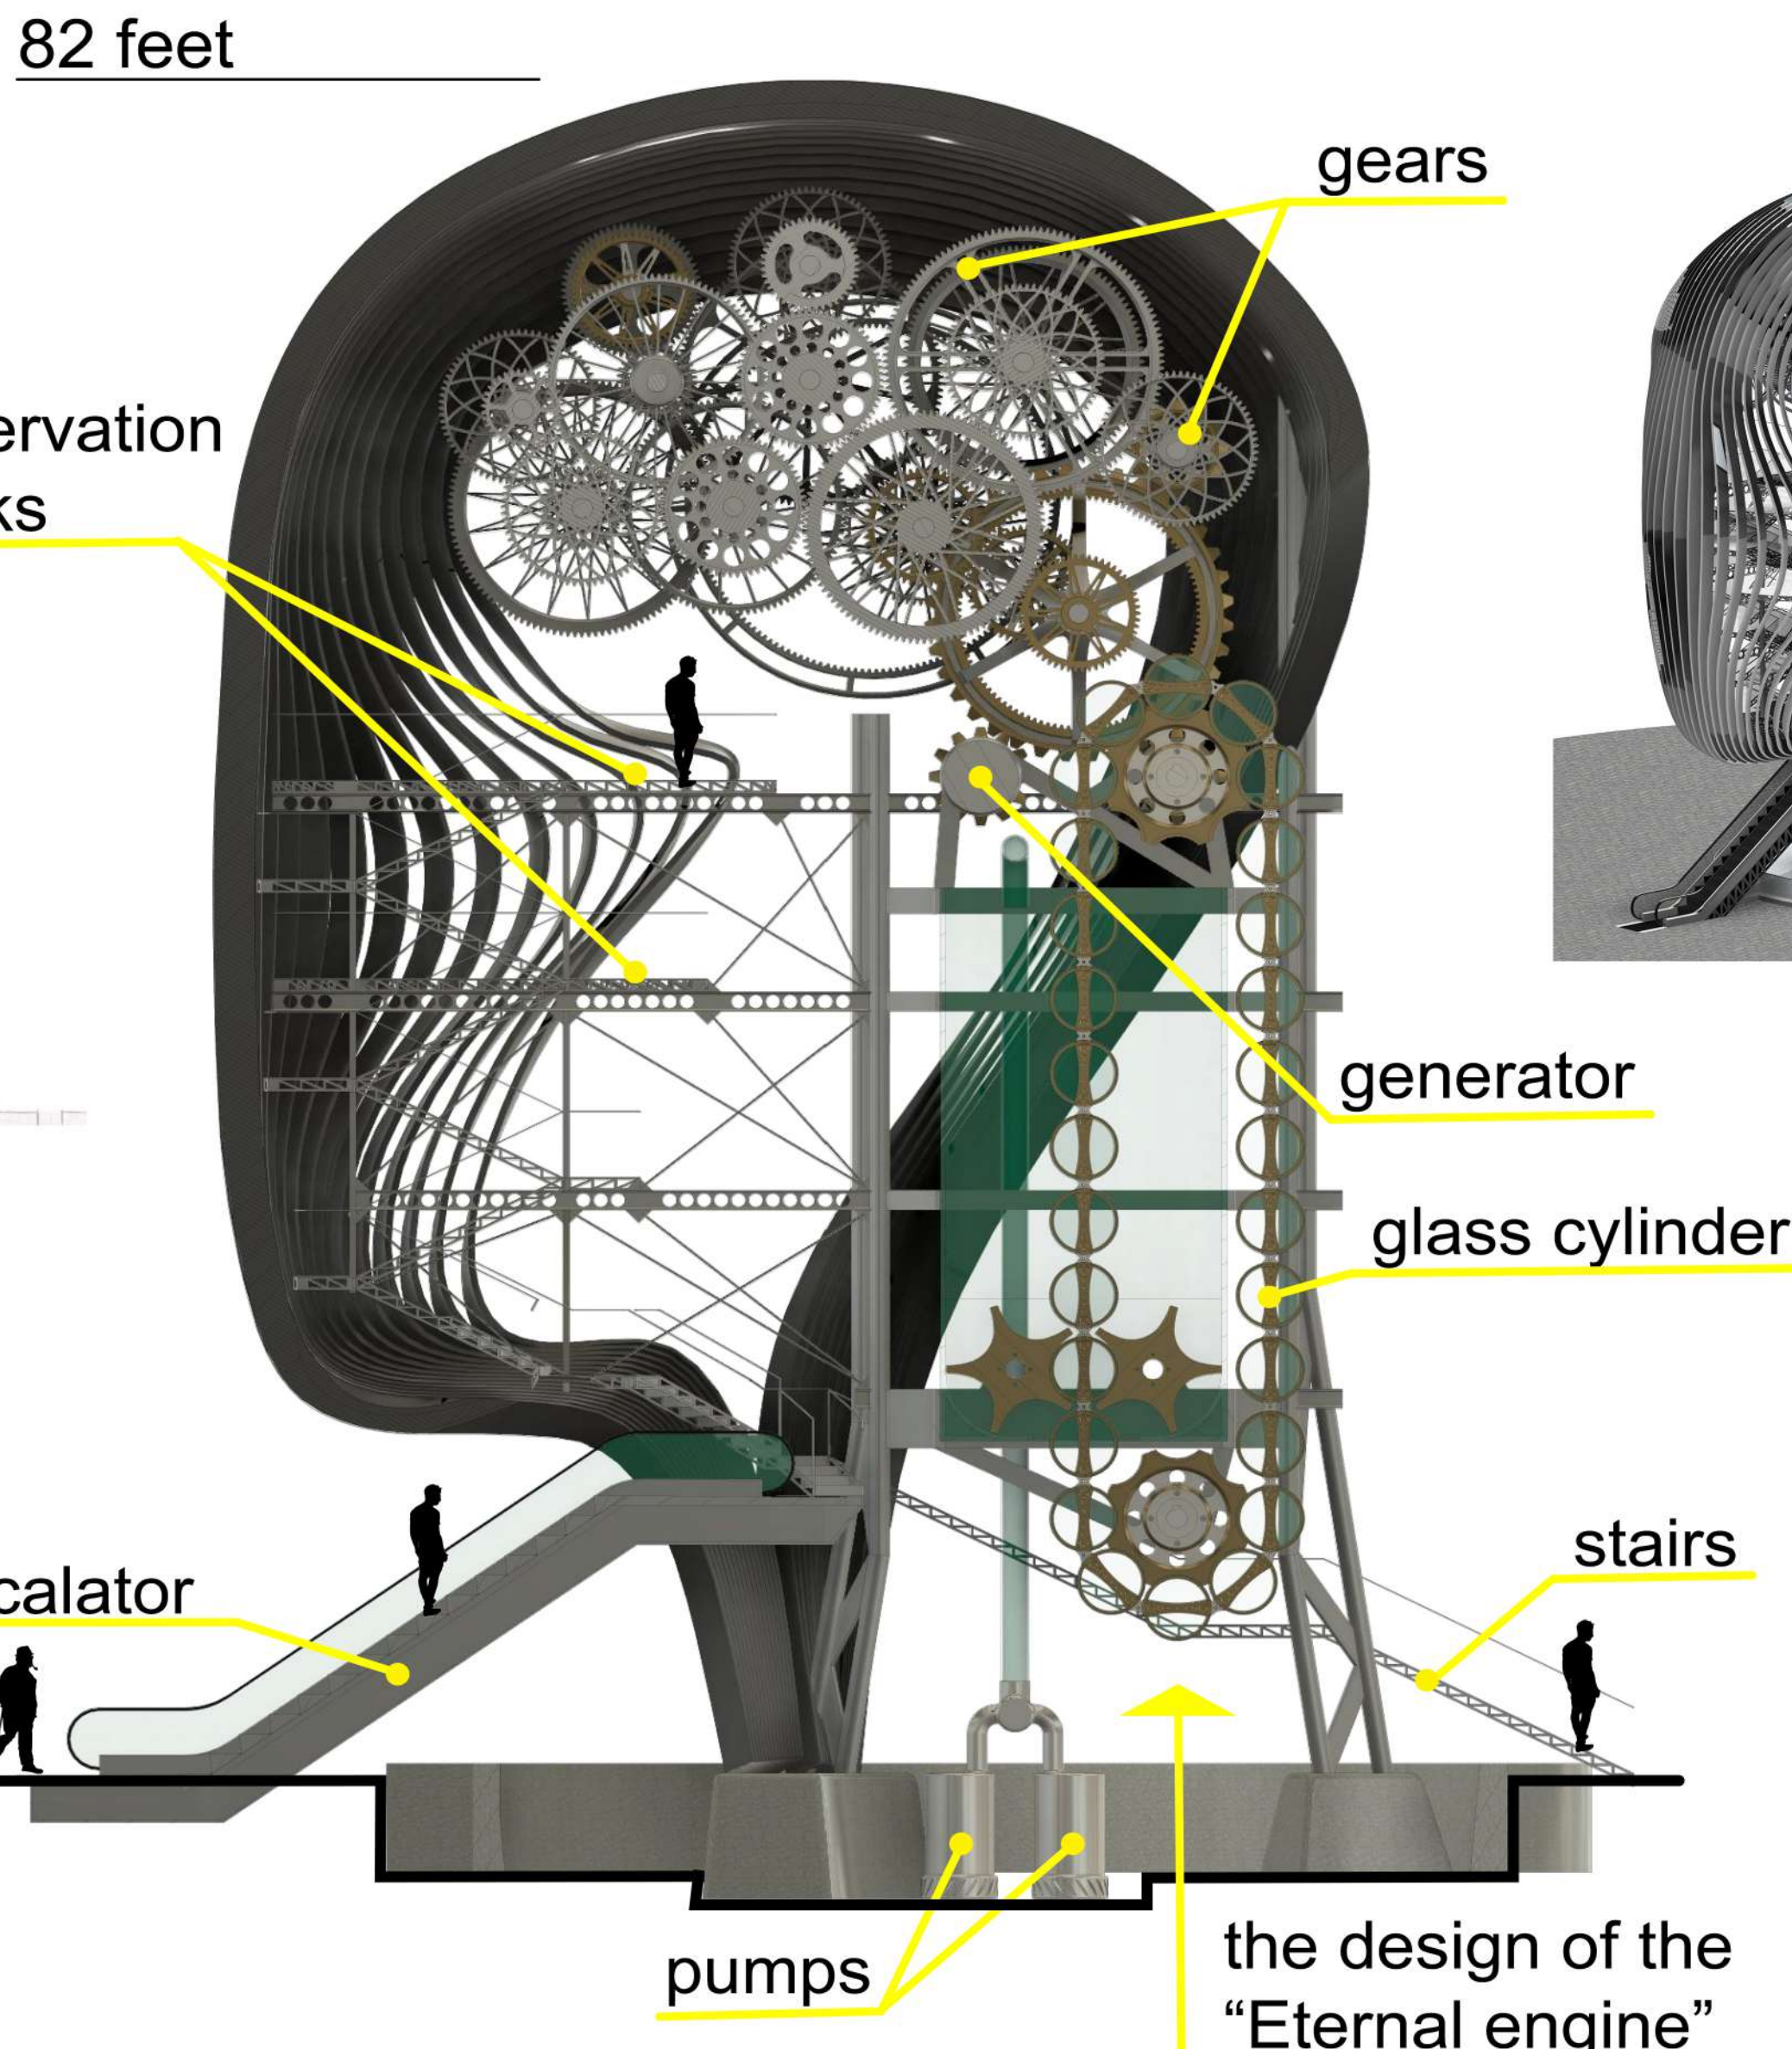

This is a conflicting combination ; The acting "Perpetuum mobile" rejected by science and dynamic mechanism of the practical thinking head of the innovator  
 One principle – two designs (A, B)

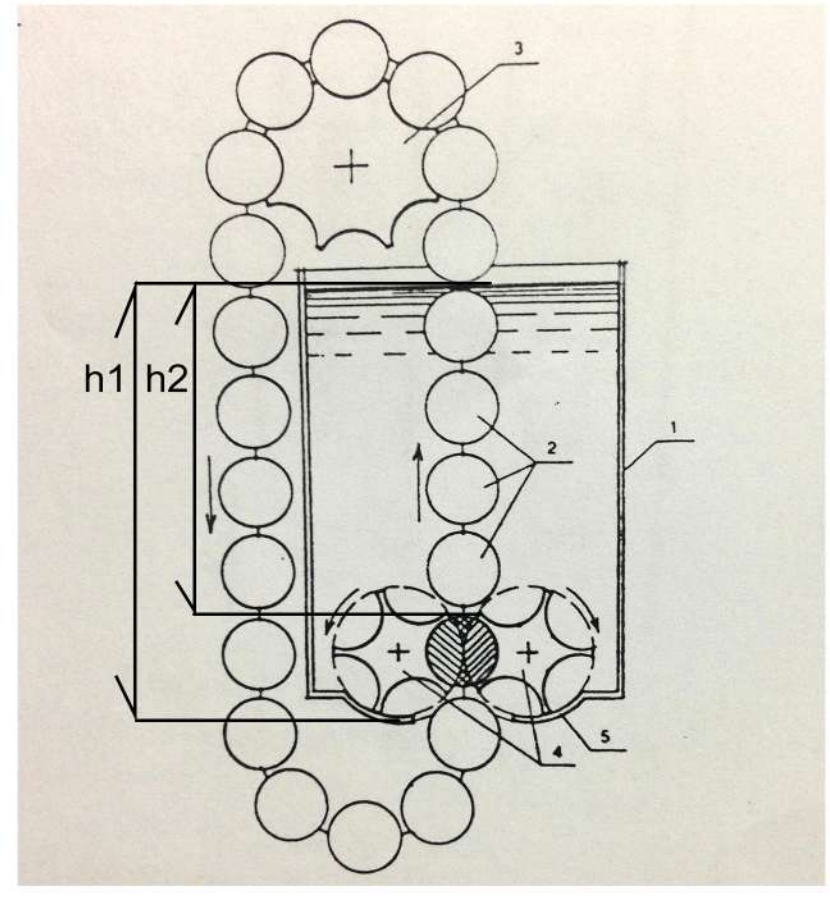

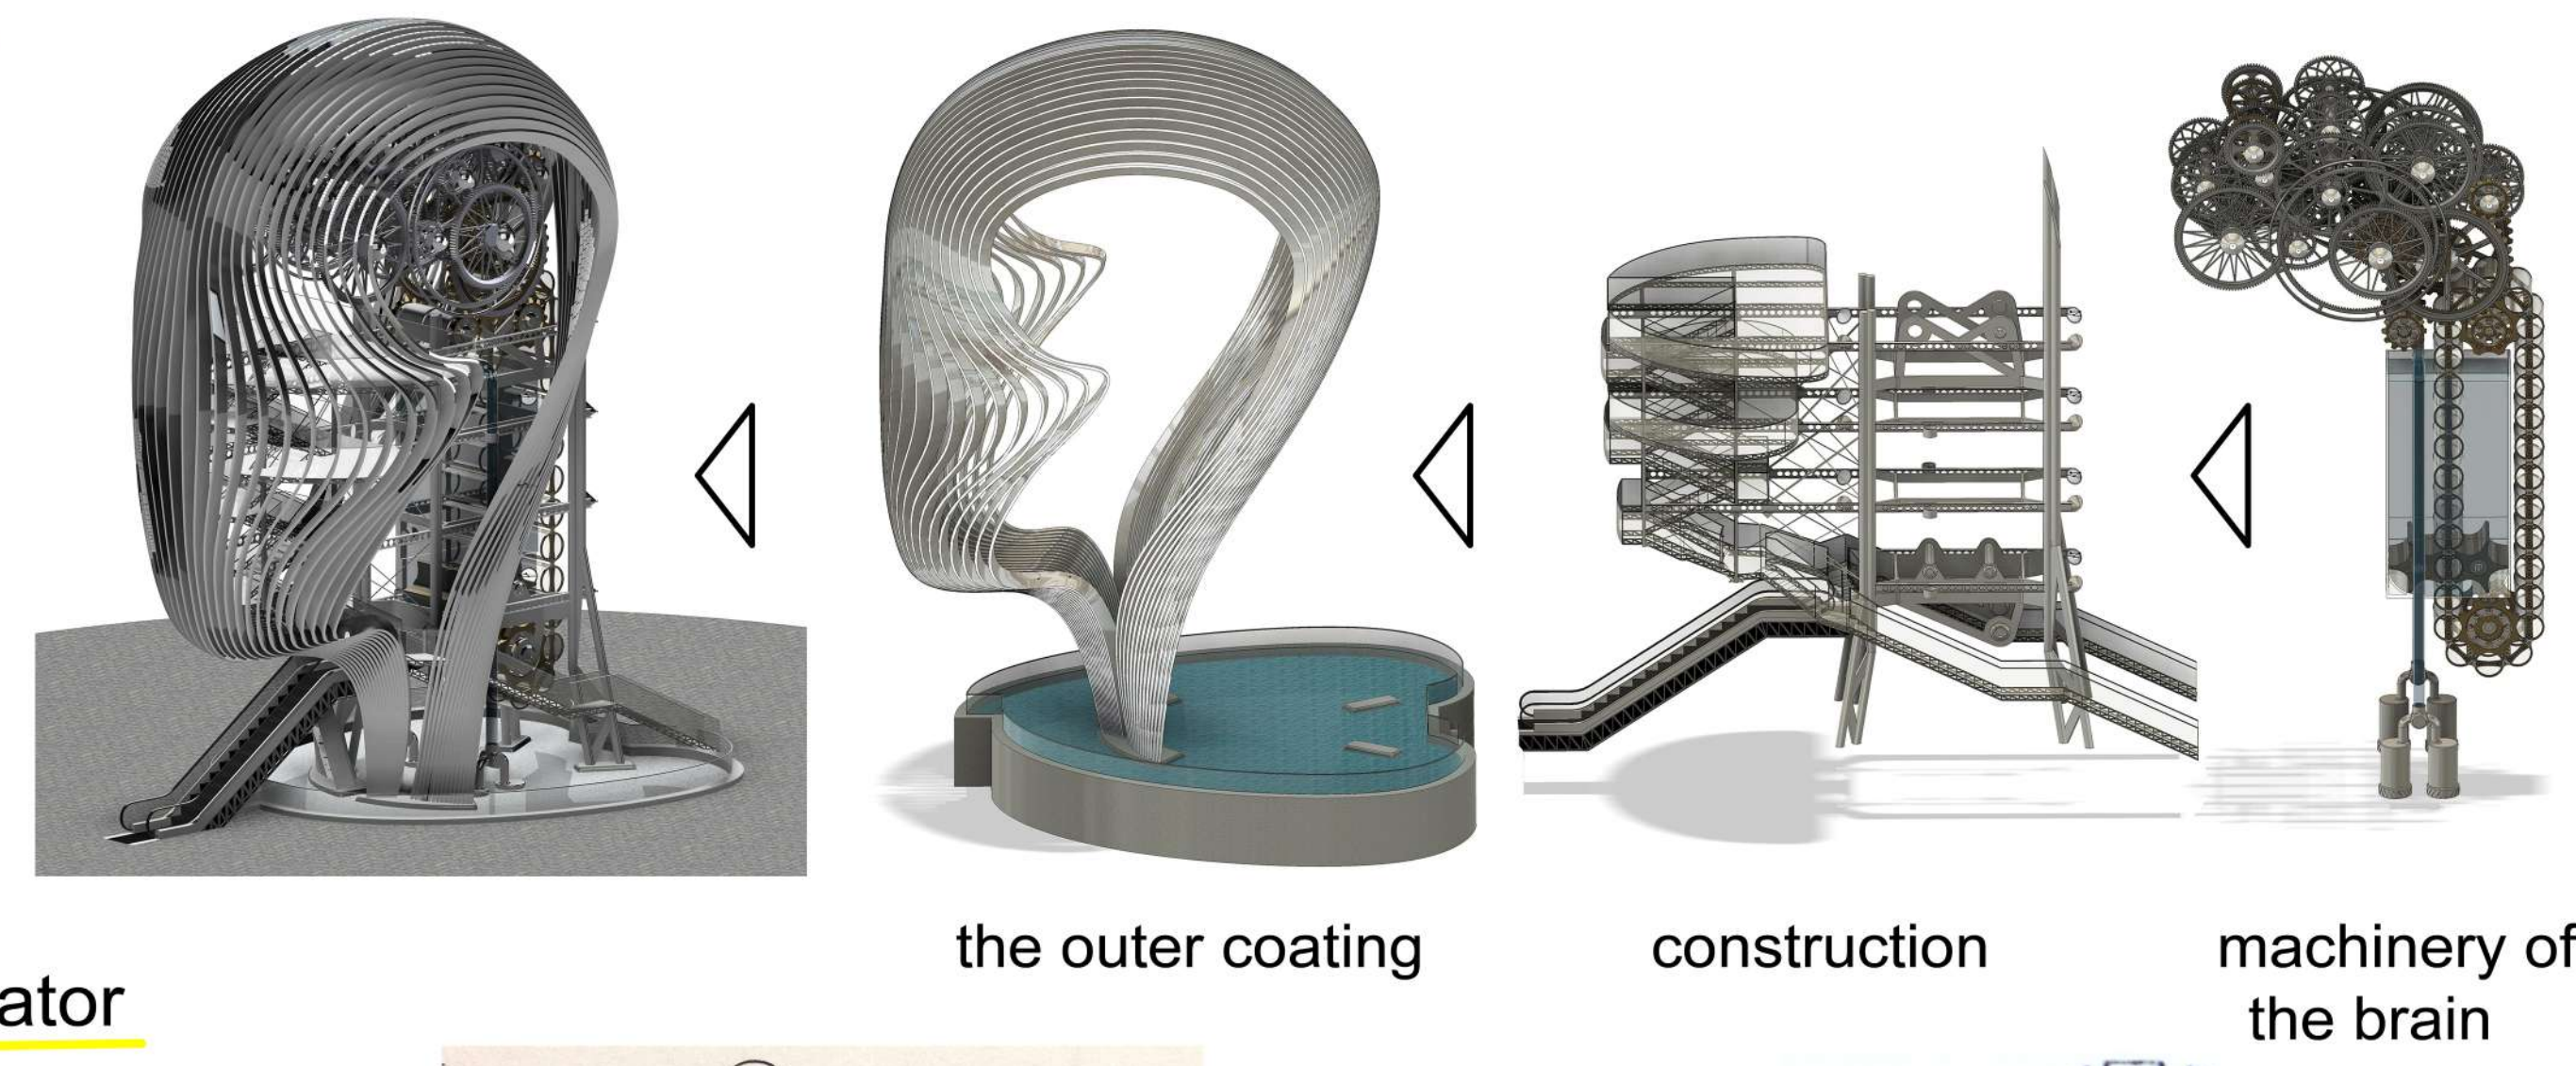

Design "A" head design with vertical stripes

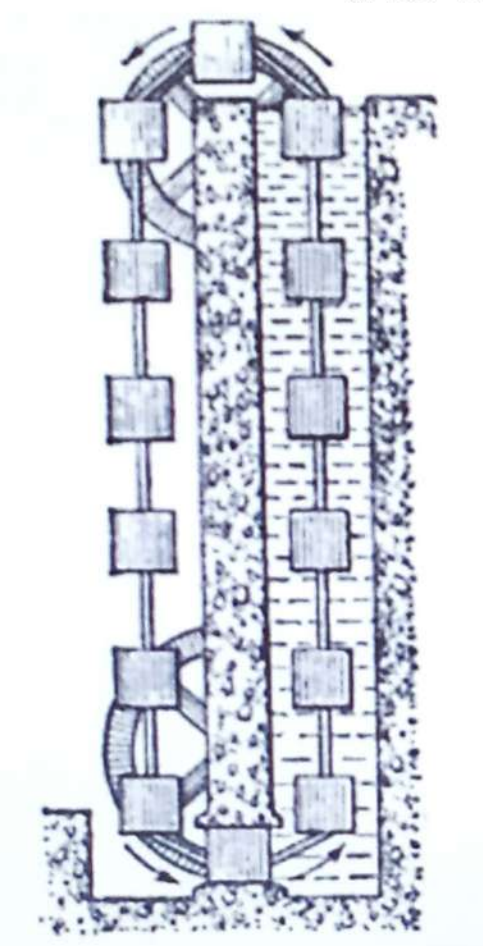

Design "B" with the thoughtful face of an innovator

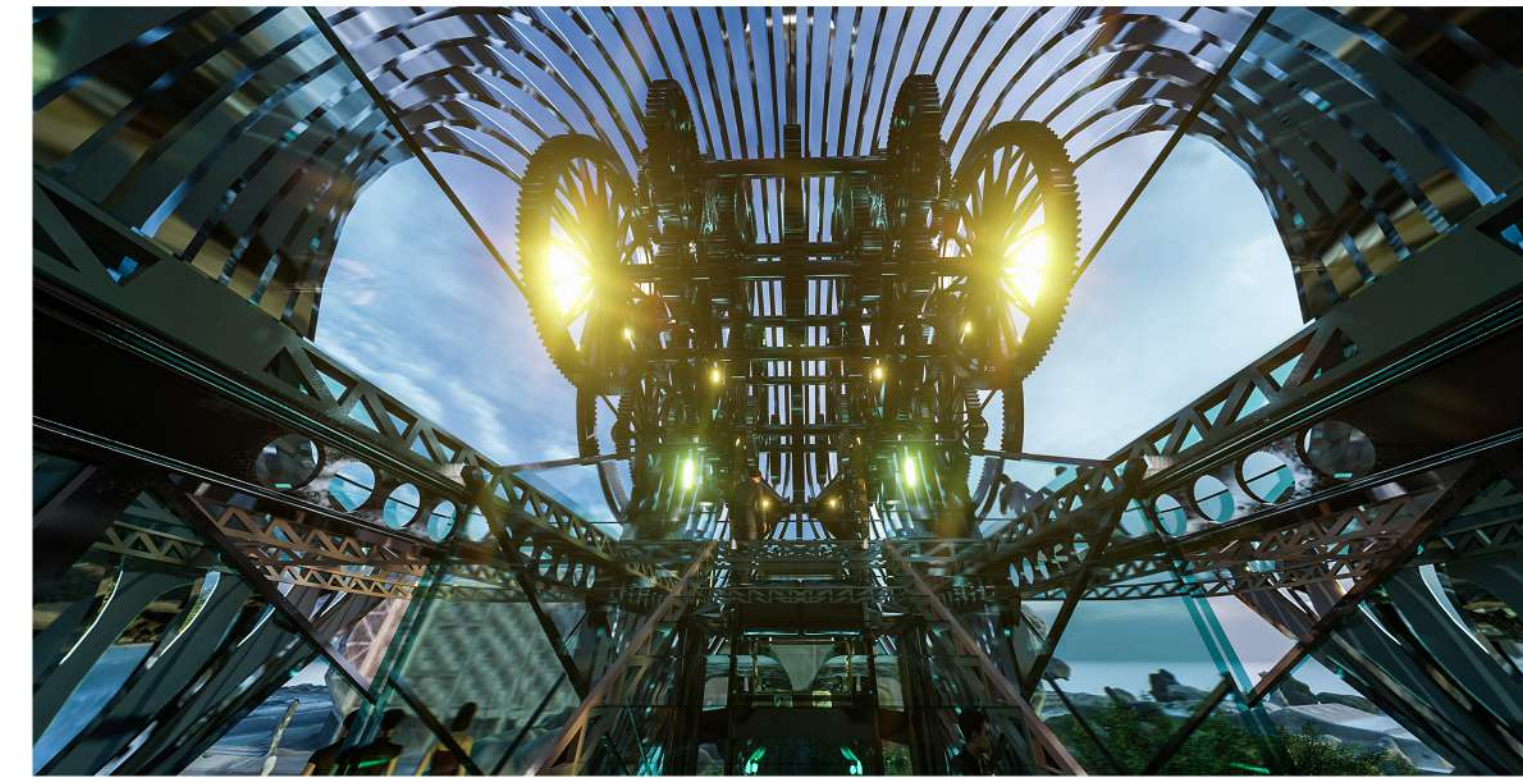

For curious visitors, there is an opportunity to get inside and study "how" new ideas are recreated.  
**SECTION**

The scheme from the patent "Hydraulic engine by ..."  
 Author- author of this proposal.  
 Archimedes; principle  
 $+ h1 > h2 = \text{motion}$

The ancient task of " Perpetuum mobile"  
 The acting model of "perpetual motion" can be viewed in the attached video.

You can place advertising logos of the leading "engines" of new innovations and successful business of modern technologies in glass cylinders.  
 These are; Google, Facebook, Tesla, Amazon, Uber, etc. .  
 It's effective, profitable show that will appeal to all.
